- All our puppies are sold as pets and come with limited AKC registration which means you aren't allowed to breed or use your dog as a stud. I will give you the paperwork to register your puppy with AKC.
- We do not require the buyer to spay or neuter their puppy, but we do strongly recommend not doing so before the puppy is 24 months of age. Studies show that spaying or neutering prior to 24 months of age can greatly increase the risk of health issues as well as dysplasia. Spaying research shows that in the labrador retriever breed it is preferable to wait until your female has had at least one heat cycle and her body especially her bones have matured in place which is around 2 years of age.
- All Chestnut Hill Labradors female breeding stock including all studs that are used are screened for the following:
 - OFA Hips and elbows, eyes and heart
 - Genetic testing done for CM, CY, DM, EIC, HNPCK, HUU, PKD, PRA, SD2,

And Copper Toxmosis

- If within 1 year your dog is diagnosed with hip dysplasia with a severe rating by OFA we will refund you the original purchase price or replace the puppy. The dog must not have been bred, abused or injured for this contract to be valid.
- There is no refund if the dog has been in an accident or comes down with any illness. It is the owner's responsibility to vaccinate and care for your dog.
- I understand that my initial deposit to hold a puppy on an existing litter is non-refundable.
- Due to the risks of personal checks, we will only accept cash, Venmo or PayPal.
- When you take your puppy home, he/she will have a health certificate, their first shots, and will have been wormed at 2, 4, 6, and 8 weeks.
- If for some reason you can no longer keep your dog, please notify us as we may be able to help find a new home. (original buyer only)

***** I have read and understand the above contract and agree to the stipulations and terms therein.
